Lucas Rocha

Fullstack Developer | .NET Core Specialist | Angular
Campinas, São Paulo, Brazil

Summary

Hello! My name is Lucas, I'm 25 years old, and I've been working in programming for over 8 years.

I am completely passionate about what I do. Since 2016, when I started in this field, I have never regretted beginning this journey of continuous learning.

I am a full stack developer, but my favorite part is backend with .NET.

Outside of work, I have various hobbies such as tabletop games, computer games, playing the guitar, programming, etc.

I'm a pet parent, I like tattoos, and the ones I have are related to my favorite movies/books, Lord of the Rings. I enjoy painting RPG miniatures, it's a hobby that teaches me a lot about patience, trial and error, and not giving up before seeing the final result.

My website is devlucasrocha.com.br and my phone number is +55 19 9 9381 4321.

Experience

AgileEngine
Fullstack Developer
April 2022 - Present (2 years 1 month)
Brazil

Working as a full stack developer, using .NET Core (6+) on the backend in a microservices architecture and Angular (12+) on the frontend. We use PubNub for real-time communication between applications and AWS for databases, lambdas, gateways, etc. Applications are Dockerized and orchestrated with Kubernetes, with CI/CD on GitLab. Our applications have unit tests and integration tests to ensure stability despite changes. We use SCRUM and

follow a 2-week sprint, completing all rituals. The client I work with is from the United States, so I use English for daily text/voice communication.

CI&T

Senior System Analyst

February 2022 - March 2022 (2 months)

Campinas, São Paulo, Brazil

Working with an international client, where I worked with a team based in Brazil and India to create microservices for an existing application. The microservices were being developed using .NET 6 and Kafka for inventory control.

NAVA - Technology for Business

Senior Developer

January 2021 - January 2022 (1 year 1 month)

São Paulo, Brasil

Remotely allocated at Banco Safra, I worked on various projects, including Open Banking, credit operations, and other internal projects. The projects I worked on used .NET Core 3.1 and NodeJS to build APIs, new background processes with Hangfire, Kafka, etc.

Pasquali Solution

.NET Developer

July 2020 - January 2021 (7 months)

Americana, São Paulo, Brazil

Development of an internal tool for people, business, and values using .NET Core (Windows Forms), Entity Framework Core, Dapper, and MySQL.

Tempus Digital

Full-stack developer

May 2018 - July 2020 (2 years 3 months)

Americana, São Paulo, Brazil

As a developer working with various clients and projects, I used various technologies and tools, such as .NET Core for projects with Razor, MVC, APIs, using Entity Framework Core, CQRS, SQL Server, among other things. On the frontend, I worked with Angular, Vue.JS, Stencil.JS, and other technologies.

Indra

Systems trainee

April 2017 - April 2018 (1 year 1 month)

Campinas, São Paulo, Brazil

Development in .NET Framework, using ASP.NET WebForms, JQuery, and SQL Server. Creation of new screens and processes for insurance and capitalization systems.

Tempus Digital

Programming internship

August 2016 - February 2017 (7 months)

Americana, São Paulo, Brazil

As an intern, I was learning to develop new screens with Angular 2 and Ionic 2. On the backend, using mediator and CQRS, I created and updated new APIs using .NET Core, CQRS, and Entity Framework Core, along with Azure SQL Server as the database. The application I worked on used Azure for deployment, with a strategy where the Angular application was statically deployed on the same backend service.

Education

Faculdade Anhanguera

Bachelor's degree, Computer Science · (2016 - 2019)
